Soft Skills

Leadership

Proven ability to lead and mentor cross-functional teams to achieve project milestones.

Adaptability

Thrive in fast-paced environments, quickly adjusting to new technologies and platforms.

Communication

Excellent verbal and written communication skills, ensuring clear and effective collaboration.

Problem Solving

Strong analytical skills, capable of implementing robust, scalable solutions.

Continious Learning

Commitment to staying updated with modern app architecture and software engineering practices.

Industry Skills

Platforms

Android, iOS, Backend

Languages

Kotlin, Java, Swift, Objective-C, JavaScript, Typescript, SQL, Dart, HTML, CSS

Programming Paradigms/Engineering Principles

SOLID Principles, Clean Architecture, Vertical Slice Architecture, Screaming Architecture,, Functional Programming, Reactive Programming, VIPER, Redux, View Layer MV* Architectures, Test-Driven Development, Continuous Integration/Continuous Deployment (CI/CD)

Professional Summary

Dynamic and seasoned software engineer with extensive experience in developing, optimizing, and maintaining Android and iOS applications using Kotlin and Swift. Adept at implementing robust, scalable solutions across various domains including e-commerce, financial services, transportation, and digital advertising. Proven ability to adapt and thrive in fast-paced environments, demonstrating leadership in guiding cross-functional teams toward achieving project milestones. With a profound understanding of modern app architecture and a commitment to continuous learning, I am poised to harness my experience to deliver high-quality and performant applications.

Work Experience

-
Now

Senior Mobile Engineer

RedAirship Pte Ltd. (<https://redairship.com>)

- Situation: Joined the team at the project's inception to develop a mobile finance app for a Singapore bank.
- Task: Facilitate seamless coordination between our client's in-house team and internal teams for iOS and Android, ensuring alignment across platforms and addressing cross-platform issues.
- Action: Contributed to critical features such as Onboarding, Bank Accounts List, Account Dashboard with Graphs, Funds Transfer, and Account Opening. Collaborated with a third party to develop an SDK integral to the project, handling deep technical liaison work, debugging, and integrating the SDK.
- Result: Ensured seamless operation within our application, highlighting technical acumen and strategic problem-solving abilities.

Lead Developer

InnovationTeam (<https://innovationteam.com>)

- Situation: Led the offshore development team for the MySTC app, a key service for millions of users in Saudi Arabia and other Gulf countries.
- Task: Oversee the creation of new features and maintenance of existing ones, ensure stability and ease of use for the app.
- Action: Implemented Clean Architecture and MVVM design pattern, using libraries such as RxJava/RxKotlin, Gson, and Retrofit. Provided mentorship and guided the team in following processes.
- Result: Successfully delivered a stable and efficient app, enhancing user experience and meeting team objectives effectively.

Full Stack Web and Mobile Developer

Internet Strategy Branding and Execution (ISBX) (<https://www.isbx.com>)

- Situation: Contributed to the WebSafety platform, addressing web, Android, iOS, and backend development.
- Task: Develop across multiple facets of the platform to ensure comprehensive mobile development.
- Action: Engaged in Android and iOS development, ensuring effective navigation and contribution across platforms.
- Result: Delivered a robust and comprehensive platform, highlighting versatility and comprehensive mobile development skills.

Libraries, Own Projects, Volunteering, Advocacy, Hobby Projects

- Haven Protocol (Off-chain server): Developed the technical infrastructure for a decentralized social space, showcasing ability to innovate and work with cutting-edge technologies.
- Project BASS (Android): A volunteer project for crowdsourcing data to improve local internet quality in the Philippines, highlighting commitment to community and technology improvement.
- Map Radius Marker Builder (Kotlin Android Library): Developed a utility for Google Maps, underscoring technical proficiency and contribution to the Android developer community.
- Portable Aircon (Meme App): A creative and fun personal project.
