[professional\_summary]

AI-accelerated developer with deep platform knowledge and 10+ years of experience shipping production systems across fintech, telecom, transport, rewards, safety, and e-commerce. Strong in Kotlin, Jetpack Compose, mobile architecture, performance tuning, release hardening, and third-party integrations. Known for high-output execution, strong engineering judgment, and moving effectively across Android, iOS, backend, product, and design to ship reliable user-facing systems.

[FOCUS\_AREAS]

High-output execution loops with AI assistance

Deep platform knowledge across Android, iOS, and backend

Architecture leadership and fast, reliable delivery

Fintech-grade quality controls and release hardening

[career\_trajectory]

Experience

Lead Android Developer

DEC 2025 — MAY 2026

Littlepay

- Led Android delivery and technical direction for Littlepay mobile initiatives.
- Worked across product, design, and backend stakeholders to keep implementation quality, release confidence, and user-facing reliability high.
- Guided architecture and code quality decisions with an emphasis on maintainable, testable Android code.

Senior Mobile Engineer

JUN 2021 — DEC 2025

RedAirship Pte Ltd

- Built and launched a new mobile banking app for a major Singaporean bank, shipping onboarding, account dashboard graphs, transfers, and digital account opening with Android and iOS feature parity.
- Integrated third-party SDKs, refactored selected modules to reduce coupling, and improved unit-test coverage for critical fintech flows.
- Improved checkout reliability, UI responsiveness, and release hardening on openpay, and shipped production fixes and features for Solo's whitelabel delivery brands.

Lead Developer

MAY 2020 — JUN 2021

InnovationTeam (MySTC, Saudi Telecom)

- Led an offshore team of five senior Android engineers on MySTC, serving 10M+ installs across multilingual customer journeys.
- Drove Clean Architecture and MVVM adoption with RxJava and RxKotlin, improving modular boundaries and release confidence.
- Delivered performance, stability, and data synchronization improvements across account, ordering, and support flows.

Team Lead

JUN 2018 — MAY 2020

iPARA Technologies and Solutions (OWTO)

- Led cross-functional delivery across Android, iOS, and backend for a ride-hailing platform that grew to 500K+ downloads.
- Architected the mobile app with Uber RIB-inspired patterns to support modular growth and clearer ownership boundaries.
- Improved booking reliability, payment-path handling, and backend API coordination for real-time transport flows.

Senior Android Developer

JUN 2016 — JUN 2018

YOYO Holdings Pte. Ltd. (PopSlide)

- Led Android development for a rewards app with 1M+ downloads across Southeast Asia.
- Migrated large Java surfaces to Kotlin, reduced regressions in fragile areas, and shipped safer feature rollouts through A/B testing and guardrails.
- Improved API and caching behavior while keeping monetization-critical lockscreen and notification surfaces stable.

Full-Stack Web and Mobile Developer

MAY 2014 — JUN 2016

Internet Strategy Branding and Execution (ISBX)

- Delivered end-to-end features for WebSafety across Android, iOS, web, and backend systems.
- Worked through undocumented Android APIs, GPS and sync reliability, and security-sensitive feature requirements.
- Helped ship a robust parental-controls platform with stronger operational and compliance posture.

[selected\_projects]

Projects

OCBC

Mobile banking delivery for a major Singaporean bank, including onboarding, account dashboards, transfers, digital account opening, and guarded third-party SDK integration.

[FINTECH]

MySTC

Telecom-scale Android product serving 10M+ installs, where I led a team of five senior engineers and drove modular, multilingual stability improvements.

[TELECOM\_SCALE]

OWTO

Ride-hailing platform work across Android, iOS, and backend delivery, improving booking reliability, payment-path handling, API contracts, and release ownership as the product scaled to 500K+ downloads.

[TRANSPORT]
